

Create Grades

To Do: Grades

- Currently the app does not keep track of grades for a given student
- At the moment, the UI is hard coded

The screenshot shows the GradeBook app interface. At the top is a blue header with 'GradeBook' and 'Home' links. Below this is a form for 'Receiving student information for:' with the name 'Eric Roby' entered. Underneath are three panels for 'Math Assignments', 'Science Assignments', and 'History Assignments'. Each panel has a blue header with a '+' icon, a green bar showing 'Overall: 100', and a list of two '100' scores with 'x' icons for removal. A red dashed box highlights these three panels. A red callout bubble points to the Math Assignments panel with the text 'Add support for tracking grades'.
